Impressions of Bogotá

Detailed description of the project:

The project focuses on technical consultation on the implementation of an improved land policy. Generally the project aims to improve the systems of cadastral data management. This means to harmonize and strengthen the inter-operability of cadastral data.

The project consists of three components:

- Strengthening the data management of UAEGRTD and the program of formalizing property, specifically the consolidation of existing GIS
- Supporting the improvement of methodologies of cadastral surveys, including pilot projects
- Strengthening the data exchange between the national entities involved in land policy issues (interoperability)

GCI

GCI - DR. SCHINDLER

GEO CONSULT INTERNATIONAL GMBH & CO. KG
