Detailed description of the project:

The innovation hub on GIS-based planning and monitoring for PEPs aims to develop a roadmap for the adaptation of the system, taking into account lessons-learned from India's experience in the context of India's PEP. The adaptation of the GIS-based planning and monitoring system to each national context is a necessary requirement for its effective implementation including their own social and political contexts. The overall goal of implementing a series of learning processes is to present a roadmap for implementation of GIS-based planning and monitoring tools to Malawi's and Peru's (knowledge seeker countries) stakeholders to facilitate further decision-making for their PEPs.

Country:

Peru and Malawi

GEO CONSULT INTERNATIONAL GMBH & CO. KG

GCI - DR. SCHINDLER

Detailed description of services provided:

- Analyse challenges and learning needs of each knowledge seeker country
- Synthesize learning processes necessary for each knowledge seeker country
- Give inputs to the concept and design of innovative learning formats and methodologies
- Transferring good practices and lessons-learned to the knowledge seeker countries Peru and Malawi
- Developing tailor-made knowledge products, e.g. guidelines, capacity development modules, etc.
- Supporting the implementation of all learning formats and processes
- Supporting knowledge seekers in developing their respective roadmap to adapt and implement GIS-based planning and monitoring strategies of their PEP

Roadmap for GIS-based planning and monitoring for PEP Peru
